Abstracts

The global Small Private Dental Support Organization market size is predicted to grow from US\$ 583 million in 2025 to US\$ 771 million in 2032; it is expected to grow at a CAGR of 4.2% from 2026 to 2032.

Dental Support Organization is an independent business support center contracted with dental clinics in the United States. They provide business management and support to dental practices, including non-clinical operations.

With the passage of the Affordable Care Act and the recent expansion of Medicaid, the DSO model has become increasingly popular in dental offices. In some parts of the United States, dental offices have begun transitioning from traditional clinics to a DSO model in order to provide more affordable care to a larger patient population.

According to a report released by Evaluate Medtech, the global dental device market will grow from US\$12.4 billion in 2015 to US\$18.3 billion in 2022, with a compound annual growth rate of about 5.7%. The social needs brought about by the aging population, the high incidence of oral diseases and the room for further improvement of services have laid a solid foundation for the development of oral medical devices. In the future, with the application of new technologies such as VR/AR technology and 3D printing, it will have a major impact on the entire dental industry.
