The global Small Scale LNG (SSLNG) market size is predicted to grow from US\$ 9896 million in 2025 to US\$ 17990 million in 2031; it is expected to grow at a CAGR of 10.5% from 2025 to 2031.

Small-scale liquefied natural gas (SSLNG), a niche but nascent industry that is already profitable and scalable, boasts significant potential. It is well placed to meet the growing demand from the shipping and trucking industries for fuels that are more environmentally friendly than oil and diesel. SSLNG also enjoys advantages in addressing off-grid power generation for industrial and residential needs in remote locations. Because LNG burns more cleanly than other fossil fuels such as petroleum and coal, SSLNG is likely to gain further traction as market and regulatory pressures to transition to lower-carbon energy intensify. In the same way that “fracking” transformed the U.S. energy landscape, SSLNG has the potential to transform the role of gas in a number of key geographies and industry sectors.

China is the largest Small Scale LNG (SSLNG) market with about 33% market share. Europe is follower, accounting for about 28% market share. The key manufacturers are Guanghui Energy, Gasnor, Kunlun Energy, Xilan Natural Gas, Shaanxi Yanchang Petroleum, Gasum, Hanas, Yuanheng Energy, China National Coal Group, Hebei Huaqi Natural Gas, Equinor, Nippon Gas, Engie, PetroChina, Linde, CNOOC etc. Top 3 companies occupied about 21% market share.
