Abstracts

The global Small Standby Power Generators market size is predicted to grow from US\$ 1757 million in 2025 to US\$ 2901 million in 2032; it is expected to grow at a CAGR of 7.6% from 2026 to 2032.

A standby generator set offers many features not found on portable generator sets, such as a more sophisticated control system, a fully weather-protective enclosure, significantly quieter operation, and more capacity so you can power more conveniences. It goes on automatically when you need it and shuts down automatically once main power is restored. It is connected directly to a fuel system and your home's electrical system so you won't have to fill a gas tank or manually transfer power from the utility to the home standby unit. Currently, the typical models of Small Standby Power Generators include Generac's Guardian 8kVA 50Hz Standby Generator, Briggs and Stratton's PowerProtect™ Standby Generator, etc.

North America is the largest consumption region, followed by Asia-Pacific and Europe.
