Smart livestock breeding is the management of the entire process. From agricultural breeding, acquisition, processing, transportation, and sales, all links are visualized and managed to achieve comprehensive and intelligent management of livestock breeding, providing scientific and technological support for government supervision and enterprise management. , Intelligent livestock and poultry breeding achieves the goals of healthy breeding, saving costs, reducing labor, saving energy and reducing consumption by changing on-site environmental conditions and remotely controlling equipment.

According to the United Nations Food and Agriculture Organization, the livestock industry provides food that contributes 34% of protein and 17% of calorie intake in the global diet. By 2050, the world's population is expected to reach 10 billion, and demand

for livestock products is expected to grow by 39%. The OECD estimates that world meat production will increase by 5% in 2021, reaching approximately 339 million tons, and imports will reach 40 million tons. Major meat exporting countries such as Brazil, the European Union, and the United States meet most of the import demand. As population and per capita income grow, meat consumption is expected to continue to increase in the coming years. China is the world's largest meat consumer and producer. The 'China Agricultural Outlook Report (2023-2032)' shows that China's meat production and consumption maintain growth, and imports first increased and then decreased. During the outlook period, as the meat industry gradually transforms and upgrades, the supply capacity of the livestock and poultry industry will increase and output will maintain growth. According to data from the National Bureau of Statistics, the added value of China's agriculture, forestry, animal husbandry and fishery will reach 9,258.2 billion yuan in 2022, a year-on-year increase of 4.3%, accounting for 7.65% of GDP. The livestock industry grew steadily throughout the year. The annual output of pig, beef, mutton and poultry was 92.27 million tons, an increase of 3.8% over the previous year.
