The global Smart Campus Solution market size is predicted to grow from US\$ 550 million in 2025 to US\$ 733 million in 2032; it is expected to grow at a CAGR of 4.3% from 2026 to 2032.

Smart campus solutions are systematic projects that use next-generation information technologies such as the Internet of Things (IoT), big data, artificial intelligence (AI), and cloud computing to digitally transform and deeply integrate core campus operations, including teaching, research, management, and daily life services. The goal is to build a fully perceptive, ubiquitous, intelligently collaborative, and highly efficient campus environment. This solution not only includes basic digital infrastructure such as networks and data centers, but more importantly, it integrates various application systems through a unified data platform and business middleware, achieving data interoperability and process optimization. Ultimately, it serves personalized teaching, precise management, scientific decision-making, and the intelligentization of campus life, making it a core carrier for promoting the modernization of education.

The construction of smart campuses has broad prospects and is evolving from "connectivity" and "management" to a deeper focus on "intelligence" and "education." Driven by the "New Infrastructure for Education" and the national digital education strategy, the future will place greater emphasis on data-driven personalized education, AI-enabled personalized learning path planning, and the construction of virtual and integrated teaching environments. With the popularization of 5G and XR technologies, immersive smart classrooms and metaverse campuses will become the focus of innovation. Meanwhile, the solutions will be more open, connecting a wider range of educational technology applications through platform-based and ecosystem-based models, with a focus on data security and privacy protection. Ultimately, smart

campuses will transcend the realm of mere tools, becoming a key infrastructure for reshaping the educational ecosystem and cultivating innovative talent.
