The Smart CIM Platform is a city-level digital platform based on City Information Modeling (CIM), integrating GIS, BIM, IoT, oblique photography, point cloud, underground pipelines, urban components, real-time sensing data, and AI analysis capabilities. It is primarily used to unify urban above-ground and underground, indoor and outdoor, planning, construction, and operation management data into a three-dimensional spatial model, forming a queryable, analyzable, simulateable, and interconnected 'city digital foundation.' The intelligent CIM platform emphasizes real-time sensing and access, cross-departmental business collaboration, urban operation monitoring, intelligent analysis and early warning, simulation, and digital twin applications. It's not just about displaying 3D models; it's an intelligent infrastructure supporting urban planning, construction approval, project management, urban renewal, urban lifelines, emergency command, smart parks, smart transportation, smart water management, and low-carbon management. Gross profit margin is approximately 45%?65%.
