The global Smart Electric Sofa market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

Smart electric sofa is a functional sofa that relies on electric drive and intelligent control.

Furniture manufacturing is an industry with a long history. Traditional furniture manufacturing uses wood, metal, plastic, bamboo rattan, sponge and other materials to manufacture static furniture products. The smart furniture industry is an emerging industry. It continuously integrates new technologies on the basis of traditional furniture craftsmanship, promotes the continuous iteration and upgrading of furniture products, and makes furniture products change from static to dynamic, and from single function to multi-function. The development of smart sofas is highly dependent on technological innovation, and the continuous integration of traditional furniture craftsmanship and new technologies promotes the sustainable development of the smart sofa industry. From the perspective of developed markets such as the United States, there is still a large room for improvement in the penetration rate of smart sofas; while the markets of developing countries such as China started relatively late, and the market potential is even greater.
