Smart motion sensing dimmer is an intelligent lighting control device that integrates human body sensing and brightness adjustment functions. The device detects human activities in real time through built-in infrared sensors or microwave radars. When it senses the presence of people, it automatically turns on the lights and turns them off after a delay when no one is around, achieving energy saving. It also has a dimming function, which can adjust the brightness of LED lamps steplessly through PWM or 0-10V signals according to the ambient light intensity and usage requirements.
