The global Smart Pet Food Feeders market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

A Smart Pet Food Feeder is a device designed to dispense food to your dog at scheduled times without the need for manual feeding.

Smart Pet Food Feeders often come with a food reservoir or hopper where you can store a supply of dog food. The size of the hopper determines how much food the feeder can hold, which can vary significantly between models. Automatic feeders can be powered by batteries, electricity, or both. Battery-powered feeders are more portable but require frequent battery changes, while electric models are more reliable but require a power source. Some advanced automatic feeders come with features like voice recording, so you can call your dog to the feeder at mealtime, and smartphone apps that allow remote monitoring and control.
