A Smart Restroom Management System (SRMS) is an IoT (Internet of Things)-enabled integrated solution designed to automate, monitor, and optimize the operation, maintenance, and user experience of public or commercial restrooms. By connecting sensors, data analytics, and remote management tools, SRMS replaces manual inspection with real-time data-driven decision-making?addressing pain points like occupancy uncertainty, inefficient cleaning, resource waste, and poor user satisfaction in traditional restrooms.

The global market for Smart Restroom Management Systems (SRMS) is an **emerging, high-growth niche** within the broader smart building and facility management ecosystem. Driven by heightened focus on hygiene post-COVID-19, the pursuit of operational efficiency, and rising consumer expectations for ?experiential? public spaces, the market is rapidly evolving from a novelty to a strategic investment. Key growth is fueled by IoT sensor proliferation, data analytics, and the integration of AI. The market is characterized by a mix of established building automation giants and agile tech-focused startups, with North America and Asia-Pacific leading adoption.
