In 2025, the global production of smart sonic electric toothbrush replacement heads will reach 162 million units, with an estimated average selling price of US\$3.9 per unit. The smart sonic electric toothbrush replacement head is a replaceable brush head consumable used with the smart sonic electric toothbrush handle. It usually consists of a brush head plastic base, nylon/PBT rounded bristles, metal transmission connectors, soft rubber coatings, bristle wear reminder structures, and some brands of chip identification/brush head identification structures. The main applications include daily replacement of smart sonic toothbrushes at home, oral care, children's and orthodontic care, dental clinic recommended consumables, e-commerce platform repurchase, and hotel/gift/health management scenarios. Among them, repurchase frequency and handle ownership are the core of demand, because replacement brush heads belong to the typical 'razor + blade' consumable model. The upstream of the industrial chain mainly includes PBT/nylon bristles, ABS/PP/TPE plastics, copper/stainless steel connectors, masterbatch, antibacterial materials, packaging materials and a small amount of identification chips or magnetic identification parts; the midstream includes injection molding, hair transplantation, bristle rounding, hot pressing/welding, assembly, sterilization or clean packaging, and compatibility testing; the downstream includes original brands, electric toothbrush manufacturers, e-commerce platforms, dental clinics, supermarkets, cosmetics, and cross-border e-commerce. Gross profit margin is in the range of approximately 20%-40%.
