Abstracts

The global Smart Street Furniture market size is predicted to grow from US\$ 214 million in 2025 to US\$ 493 million in 2032; it is expected to grow at a CAGR of 12.9% from 2026 to 2032.

Smart street furniture refers to urban amenities or infrastructure, typically found in public spaces, that have integrated technological capabilities to improve functionality, user experience, and sometimes sustainability. These pieces of furniture are equipped with sensors, connectivity, and often provide various services or utilities to the community.

Advancements in Internet of Things (IoT) technology are allowing for more extensive connectivity among different street furniture elements. Integration between benches, bus stops, kiosks, and other urban amenities enables a cohesive, interconnected urban infrastructure.
