The global Smart Tech Sofa market size is projected to grow from US\$ million in 2022 to US\$ million in 2029; it is expected to grow at a CAGR of % from 2023 to 2029.

Furniture manufacturing is an industry with a long history. Traditional furniture manufacturing uses wood, metal, plastic, bamboo rattan, sponge and other materials to manufacture static furniture products. The smart furniture industry is an emerging industry. It continuously integrates new technologies on the basis of traditional furniture craftsmanship, promotes the continuous iteration and upgrading of furniture products, and makes furniture products change from static to dynamic, and from single function to multi-function. The development of smart sofas is highly dependent on technological innovation, and the continuous integration of traditional furniture craftsmanship and new technologies promotes the sustainable development of the smart sofa industry. From the perspective of developed markets such as the United States, there is still a large room for improvement in the penetration rate of smart sofas; while the markets of developing countries such as China started relatively late, and the market potential is even greater.

Smart sofa is a functional sofa that relies on electric drive and intelligent control.
