Smart Visor – Blocks the sun, not your view. Increases visibility through the visor by up to 90%.

The Smart Visor market has emerged as a technologically advanced solution for addressing sun glare and enhancing driver safety. Unlike conventional visors, these visors feature adjustable, tinted, or LCD screens that automatically block glare and adjust transparency based on lighting conditions. Some models incorporate AI and facial recognition to personalize the visor's positioning and offer information like navigation cues or alerts. This innovative approach improves visibility and reduces driver distraction. As smart vehicle technologies gain traction, the Smart Visor market is poised for growth, catering to safety-conscious consumers and manufacturers seeking to integrate intelligent systems that optimize driving experiences.
