Biometrics is a combination of high-tech means such as computer and optics, acoustics, biosensors, and biostatistics principles, using the inherent physiological characteristics of the human body (such as fingerprints, facial images, iris, etc.) and behavioral characteristics (such as handwriting, handwriting, etc.). voice, gait, etc.) for personal identification. Biometric technology is more secure, confidential and convenient than traditional identification methods. Biometric identification technology has the advantages of not easy to forget, good anti-counterfeiting performance, not easy to be forged or stolen, 'carried' and available anytime, anywhere.
