The global SMD-type PTC Thermistor market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

SMD type PTC thermistor (Surface Mount Device Positive Temperature Coefficient Thermistor) is a surface mount positive temperature coefficient (PTC) thermistor. Its main characteristic is that when the temperature rises or the current is too large, its resistance value increases significantly, so as to achieve the overcurrent protection and temperature regulation of the circuit. SMD type PTC thermistor has the advantages of small size, easy to automate the production and application of high-density circuit boards, and is widely used in consumer electronics, automotive electronics, industrial control and other fields.

The main raw materials for SMD PTC thermistors include high performance ceramic powders such as barium titanate (BaTiO₃) as the base material, dopants used to adjust the electrical and thermal properties, conductive materials such as silver, copper, and encapsulation materials such as epoxy resin. The specifications of common SMD-type PTC thermistors are 0603 package, 1005 package and 1608 package, and the average market price is US\$0.1, US\$0.15 and US\$0.25 per piece, respectively. With the development of electronic products towards miniaturisation, lighter weight and higher integration, SMD-type PTC thermistors will evolve towards smaller packages, improved current-carrying capacity and higher integration to meet the demand for high-efficiency electronic components in mobile electronic devices, automotive, 5G communications, smart home, and etc.

United States market for SMD-type PTC Thermistor is estimated to increase from US\$

million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for SMD-type PTC Thermistor is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for SMD-type PTC Thermistor is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
