## Abstracts

The global SMS Bulk Service market size is predicted to grow from US\$ 2774 million in 2025 to US\$ 4931 million in 2032; it is expected to grow at a CAGR of 8.6% from 2026 to 2032.

SMS Bulk Service (also referred to as A2P SMS, enterprise SMS, or mass texting) is a cloud-enabled communication solution that enables businesses, government agencies, and organizations to send high-volume, automated text messages to a large recipient base simultaneously via telecom operator networks or CPaaS platforms. It serves as a direct, real-time, and universally accessible channel for transactional alerts, marketing promotions, authentication, and operational notifications.

The global SMS Bulk Service market will maintain robust, double-digit growth, with APAC as the primary growth engine and North America/Europe as mature, high-margin markets. Key shifts include:

- Transactional SMS retaining volume leadership, while promotional and conversational SMS drive value growth via AI and RCS.
- Convergence of SMS with omnichannel platforms, AI, and blockchain for intelligent, secure, and interactive communication.
- Market polarization: Global CPaaS leaders lead high-end innovation; regional aggregators dominate entry/mid-tier volume in emerging markets.
- Compliance, deliverability, and AI personalization becoming non-negotiable service differentiators, replacing price as the primary purchasing factor.

- SMS will remain irreplaceable for universal reach, security, and immediacy, even as OTT channels expand, solidifying its role as a foundational enterprise communication tool.
