A snoring nose patch is a small adhesive strip or patch designed to be applied to the outside of the nose to help reduce or eliminate snoring. These patches work by gently opening up the nasal passages, making it easier to breathe through the nose and potentially reducing snoring caused by nasal congestion or restricted airflow. Many nose patches contain flexible bands that lift the sides of the nose, while others might use ingredients like essential oils or menthol to promote clear breathing. Snoring nose patches are non-invasive and are a popular alternative to other snoring remedies like mouthpieces or nasal sprays.
