The global Snow Sweeper market size is predicted to grow from US\$ 210 million in 2025 to US\$ 295 million in 2032; it is expected to grow at a CAGR of 3.6% from 2026 to 2032.

A Snow Sweeper is a type of winter road maintenance equipment designed to remove snow and ice from roads, highways, airport runways, railways, and urban infrastructure. It typically uses mechanical methods such as rotating brushes, plow blades, blowers, or combined systems to clear accumulated snow and improve surface safety. Snow sweepers can be mounted on trucks, tractors, or purpose-built vehicles, and are essential for maintaining transportation efficiency and preventing accidents in cold and snowy regions. In 2025, global Snow Sweeper production reached approximately 6120 units, with an average global market price of around US\$35000 per unit. The production capacity for Snow Sweeper in 2025 was approximately 6500 units. The typical gross profit margin for Snow Sweeper is between 20% and 40%.

The Snow Sweeper market refers to the global industry encompassing the manufacturing, sales, and deployment of snow removal equipment for municipal, transportation, and industrial applications. Market demand is primarily driven by urbanization in cold regions, increasing investments in road safety, airport operations, and railway infrastructure, as well as the need for efficient winter maintenance under extreme weather conditions. The market includes compact urban sweepers, heavy-duty highway snow plows, and high-capacity airport runway sweepers, with growing emphasis on multi-functional, automated, and environmentally efficient solutions.
