A snowblower or snow thrower is a machine for removing snow from an area where it is not wanted, such as a driveway, sidewalk, roadway, railroad track, ice rink, runway, or houses. The term 'snow thrower' is often used to encompass snow throwers and snow blowers, however, in proper a snow thrower is a machine that uses a single stage to remove or 'throw' snow while a snowblower uses two stages to remove or 'blow' snow. It can use either 7?HP?12 power (line power or battery), or a HP?7oline or diesel engine to throw snow to another location or into a truck to be hauled away. This is in contrast with the action of snow plows, which push snow to the front or side.
