SOAR Security Software refers to Security Orchestration, Automation and Response platforms used by security operations centers to connect security tools, automate repetitive response tasks, manage incidents, run playbooks, and coordinate threat intelligence.

North America is the largest SOAR market. Europe is a major mature market, driven by GDPR, NIS2, financial-sector cybersecurity rules, critical-infrastructure protection, and strong demand from banking, telecom, government, healthcare, and manufacturing.

Asia-Pacific is the fastest-growing region, driven by cloud migration, digital government, e-commerce, fintech, smart manufacturing, and rising cyberattack exposure in China, India, Japan, South Korea, Singapore, and Australia.

Latin America, the Middle East, and Africa are smaller but expanding markets. Demand is concentrated in banks, telecom operators, government agencies, oil and gas, utilities, and large enterprises that are building formal SOC or managed SOC capabilities.
