The global Sodium Ethylparaben market size is predicted to grow from US\$ 9.44 million in 2025 to US\$ 12.03 million in 2032; it is expected to grow at a CAGR of 3.5% from 2026 to 2032.

Sodium Ethylparaben is a highly effective, broad-spectrum, water-soluble preservative belonging to the sodium salt family of parabens. It primarily exists as a white powder that is readily soluble in water; it is frequently utilized as an antimicrobial agent in pharmaceuticals, food products, cosmetics, and textiles to inhibit microbial growth and extend product shelf life.

In 2025, global sales volume is projected to approach 1,000 tons, with a market price of approximately \$8.3 to \$11 per kilogram. The industry's gross profit margin stands at around 10% to 20%.

The upstream sector relies primarily on basic petrochemical feedstocks—specifically p-hydroxybenzoic acid and ethanol—which undergo an esterification reaction catalyzed by an acid to yield ethylparaben, followed by a salification reaction with sodium hydroxide. The midstream sector encompasses the processes of fine chemical synthesis and purification. As a water-soluble, broad-spectrum antimicrobial preservative, it is renowned for its safety and high efficacy. It finds extensive application across various fields—including pharmaceuticals, cosmetics, and food products—and is particularly well-suited for manufacturing processes that require water-soluble raw materials.

United States market for Sodium Ethylparaben is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Sodium Ethylparaben is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
