The global Sodium N-Cocoyl Glycinate market size is predicted to grow from US\$ 159 million in 2025 to US\$ 258 million in 2032; it is expected to grow at a CAGR of 7.1% from 2026 to 2032.

Sodium N-Cocoyl Glycinate is a kind of amino acid-based surfactant. It's widely used in personal care. Generally it is classified as skin conditioning hair conditioning cleansing. In 2025, global Sodium N-Cocoyl Glycinate production reached approximately 21.3 K MT.

The Sodium N-Cocoyl Glycinate market is primarily driven by increasing consumer demand for natural and sustainable ingredients in personal care and cosmetic products. As consumers become more aware of the harmful effects of synthetic chemicals, they are seeking safer, milder alternatives. Sodium N-Cocoyl Glycinate, derived from coconut oil and glycine, offers a gentle yet effective solution for cleansing, making it ideal for sensitive skin and baby care products. Its mildness combined with the growing trend towards eco-friendly and bio-based ingredients is propelling its use in a wide range of skin and hair care products.

Another key driver of the market is the rise in demand for mild surfactants in facial cleansers, shampoos, and body washes. Sodium N-Cocoyl Glycinate serves as an excellent alternative to harsher surfactants, such as sulfates, which are often linked to skin irritation and dryness. Its ability to create a rich lather while maintaining skin hydration makes it a popular choice for formulators focused on developing high-quality personal care products. The increasing focus on gentle and effective products, especially in regions with a high concentration of skincare-conscious consumers, is contributing to the growth of the market.

The growing preference for sustainable and ethical sourcing is also influencing the market for Sodium N-Cocoyl Glycinate. As more brands and consumers push for sustainable ingredients, this surfactant meets the demand for a renewable, biodegradable, and cruelty-free option. It aligns well with the clean beauty movement, which prioritizes products that are not only effective but also kind to both the environment and the users. This eco-friendly profile, combined with its mildness, makes Sodium N-Cocoyl Glycinate a key ingredient in the formulation of green cosmetics and personal care products.
