The global Sodium Phosphate Glass market size is predicted to grow from US\$ 560 million in 2025 to US\$ 858 million in 2032; it is expected to grow at a CAGR of 6.3% from 2026 to 2032.

Sodium Phosphate Glass is a type of phosphate-based glass primarily composed of sodium oxide (Na_2O) and phosphorus pentoxide (P_2O_5), often modified with additives such as calcium, aluminum, lithium, or rare earth elements to improve chemical durability, thermal stability, optical performance, or bioactivity. Compared with traditional silicate glass, sodium phosphate glass offers lower melting temperatures, high thermal expansion, excellent optical transparency, controllable solubility, and strong ion-conducting properties, making it widely used in biomedical materials, solid-state batteries, optical components, sealing materials, laser technology, specialty coatings, fertilizers, and waste immobilization systems. The supply chain of Sodium Phosphate Glass starts with upstream raw materials including phosphoric acid, phosphate salts, soda ash, sodium carbonate, and specialty metal oxides supplied by chemical and mineral companies. Midstream manufacturing involves glass batching, melting, refining, forming, annealing, and surface treatment processes conducted by specialty glass producers and advanced materials companies. Downstream applications span electronics and semiconductors, medical and dental biomaterials, energy storage systems, optical fibers and laser devices, chemical processing equipment, nuclear waste containment, and industrial sealing solutions, with demand driven by advanced electronics, renewable energy technologies, healthcare innovation, and high-performance material engineering. In 2025, global Sodium Phosphate Glass output was about 400,000 tons with 500,000 tons of capacity, average prices of USD 1,200-3,500 per ton, and gross margins around 26%.

United States market for Sodium Phosphate Glass is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Sodium Phosphate Glass is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
