Consumer goods are products which are intended for everyday private consumption. They cover a large product portfolio including food and non-food categories. They can be further classified into fast moving consumer goods (FMCG) and slow moving consumer goods (SMCG). The definitions are based on how frequently products are sold to the customer, a determining factor in the rotation of goods. FMCG products have a useful life shorter than a year and are, therefore, products bought relatively frequently with recurring expenditure. This includes categories such as food and beverages, personal care, cleaning products, apparel and footwear, tobacco and pet food/pet care. SMCG products have a useful life longer than a year, comprising items such as household appliances, furniture and home improvement products. These items have a lower sales frequency and are not rotating as rapidly as FMCG. The global Consumer Packaged Goods (CPG) market size was valued at USD 2053 billion in 2022 and is expected to expand at a CAGR of 2.98% during the forecast period, reaching USD 2448 billion by 2028. Consumer Packaged Goods (CPG) is an industry term for goods that customers use and replace frequently.

LP Information, Inc. (LPI) ' newest research report, the ?Soft Foam Ear Plugs Industry Forecast? looks at past sales and reviews total world Soft Foam Ear Plugs sales in 2025, providing a comprehensive analysis by region and market sector of projected Soft Foam Ear Plugs sales for 2026 through 2032.
