Soft Multifocal Contact Lenses are specially designed contact lenses designed to help people correct vision problems at distance, intermediate and near distances. Unlike traditional single-focal contact lenses, soft multifocal contact lenses have multiple focus areas on the lens, allowing the wearer to have clear vision at a variety of distances without the need for additional glasses or lens switching.

Soft multifocal contact lenses are typically made from soft materials that fit comfortably on the surface of the eye and provide comfortable wear throughout the day. This type of contact lens is suitable for people who need to correct various visual problems such as presbyopia, myopia, or farsightedness, especially for those who are elderly or who need to frequently switch sight distances.
