The global Softgel Inspection Machines market size is predicted to grow from US\$ 226 million in 2025 to US\$ 275 million in 2031; it is expected to grow at a CAGR of 3.3% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Softgel Inspection Machines are specialized pharmaceutical and nutraceutical equipment designed to automatically inspect soft gelatin capsules (softgels) for visual defects and quality inconsistencies. These machines use optical sensors, high-resolution cameras, or vision systems to detect flaws such as cracks, air bubbles, deformities, leakage, color variation, and contamination on the surface of softgels. The inspection process ensures that only capsules meeting stringent quality standards proceed to packaging, enhancing product safety and compliance with regulatory requirements. Softgel Inspection Machines are essential in high-volume production environments for maintaining consistency, reducing human error, and increasing efficiency.

Softgel Inspection Machines typically feature inspection speeds ranging from 5,000 to 120,000 capsules per hour and accommodate capsule sizes between 2–30 mm in diameter and 5–40 mm in length. They achieve detection accuracy above 99% for defects such as cracks, pinholes, leakage, air bubbles, color deviations, and shape deformities. Equipped with high-resolution cameras (5–20 megapixels) and advanced lighting systems, these machines ensure precise multi-angle inspection. Standard features include touch-screen HMIs for real-time monitoring, automatic reject

mechanisms (pneumatic or mechanical), and compliance with GMP, CE, and FDA standards. Machines generally operate on 220V/380V power supplies and are built in compact, stainless-steel frames around 1,200 ? 800 ? 1,500 mm, making them suitable for both high-volume pharmaceutical and nutraceutical production lines.
