According to this study, the global Software Outsourcing market size will reach US\$ million by 2031.

Outsourcing has become very popular in the IT world because of its benefits, such as cost-effectiveness and flexibility. It has removed the challenges and delays traditionally associated with in-house development.

Software development is commonly outsourced to vendors or separate contractors, as it speeds up development, provides access to specialists with the expertise you may not have on your in-house team, and is usually quite cheap.

Outsourcing software services are on the rise. According to a study by Computer Economics, large organizations have increased the percentage of their IT budgets spent on outsourcing from 6.3% to 8.7% this year. Medium-sized companies too increased their budgets from 4.7% to 6.5%. The use of software development outsourcing helps companies decrease costs and get their product to market faster, so it's no wonder companies large and small are taking advantage of this trend.
