Solar-electric hybrid boats are watercraft that combine solar power and electric propulsion for movement. These boats are equipped with solar panels that convert sunlight into electricity, which is stored in batteries. The stored energy powers an electric motor that drives the boat. The hybrid system allows the boat to operate using solar energy when available, and switch to battery power or an auxiliary engine when needed, providing a clean, quiet, and efficient alternative to traditional fuel-powered boats.

United States market for Solar-Electric Hybrid Boats is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
