The global Solar Panel Refurbishment Services market size is predicted to grow from US\$ 1945 million in 2025 to US\$ 4182 million in 2032; it is expected to grow at a CAGR of 11.6% from 2026 to 2032.

Solar Panel Refurbishment Services refer to the repair, restoration, and performance recovery of aging or underperforming photovoltaic (PV) modules to extend their operational lifespan and improve energy output without full replacement. Solar panel refurbishment services are typically priced on a per-module basis, ranging from about USD 80 to USD 300 per panel depending on the level of damage, repair complexity, and technology used (such as re-lamination, glass replacement, or electrical restoration). For large utility-scale projects, pricing may also be structured around performance recovery outcomes rather than fixed unit costs, effectively translating to lower lifecycle costs per kWh when compared with full module replacement.
