The global Solar PV Mounting & Racking Systems market size is predicted to grow from US\$ 13765 million in 2025 to US\$ 30571 million in 2032; it is expected to grow at a CAGR of 12.1% from 2026 to 2032.

In 2025, global Solar PV Mounting & Racking Systems production reached approximately 94 million units, with an average global market price of around US\$ 150 per unit. Annual production capacity is 110 million units. Gross Profit Margin: 38%. Solar PV Mounting & Racking Systems are structural frameworks designed to securely hold and support photovoltaic (PV) panels in solar energy installations. The Solar PV Mounting & Racking Systems industry chain begins upstream with the supply of raw materials, primarily aluminum, stainless steel, and galvanized steel, along with components like fasteners, brackets, and foundation materials. Midstream, manufacturers design, engineer, and produce the mounting structures, which include roof-mounted, ground-mounted, and tracking systems, ensuring compliance with local regulations and structural standards. Downstream, the products are distributed through solar EPC (engineering, procurement, and construction) companies, system integrators, wholesalers, and e-commerce platforms to residential, commercial, and utility-scale solar projects. The chain is heavily reliant on efficient logistics, fabrication capabilities, and quality assurance, as the durability and safety of mounting systems directly impact the long-term performance and efficiency of solar PV installations. Solar PV Mounting & Racking Systems sector is a critical yet often overlooked backbone of the solar energy industry.

United States market for Solar PV Mounting & Racking Systems is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
