In the photovoltaic power generation system, the solar string combiner box is a wiring device that ensures the orderly connection of photovoltaic modules and the function of combining. The intelligent photovoltaic combiner box is used to connect photovoltaic arrays and inverters, provide lightning protection and overcurrent protection, and monitor the current, voltage, and lightning arrester status and circuit breaker status of a single string of photovoltaic arrays. The device can ensure that the photovoltaic system is easy to cut off the circuit during maintenance and inspection, and reduce the scope of power outage when the photovoltaic system fails. Combiner box means that the user can connect a certain number of photovoltaic cells with the same specifications in series to form one photovoltaic series, and then connect several photovoltaic series in parallel to the photovoltaic combiner box. inverter, DC power distribution cabinet, photovoltaic inverter, and AC power distribution cabinet are used together to form a complete photovoltaic power generation system, which can be connected to the grid.

The global market for Solar String Combiner Boxes is estimated to increase from US\$ million in 2021 to reach US\$ million by 2028, exhibiting a CAGR of % during 2022-2028.
