A solder-free lamp holder is an electrical component designed to securely hold and connect a light bulb or LED module without the need for soldering wires. Instead of requiring solder joints, these lamp holders use push-in terminals, screw clamps, or spring-loaded connectors to create reliable electrical contact, simplifying assembly, maintenance, and replacement.

Solder-free lamp holders are commonly used in LED lighting fixtures, automotive lights, and industrial or household lamps. They are especially advantageous in high-volume production, field installations, or applications requiring frequent bulb changes, as they reduce labor time and eliminate solder-related risks (like cold joints or overheating). Variants support different bulb bases such as GU10, E27, MR16, or COB LEDs.

United States market for Solder Free Lamp Holder is estimated to increase from US$ million in 2024 to US$ million by 2031, at a CAGR of % from 2025 through 2031.

China market for Solder Free Lamp Holder is estimated to increase from US$ million in 2024 to US$ million by 2031, at a CAGR of % from 2025 through 2031.
