Solder Paste Jet Printer is an advanced electronic manufacturing equipment. It precisely deposits solder paste onto the pads of printed circuit boards (PCBS) through non-contact jet technology. This kind of equipment does not require the use of traditional steel mesh or scrapers, and can achieve high-precision and high-consistency solder paste printing. It is particularly suitable for high-density and fine-pitch electronic component packaging. Solder paste inkjet printers can significantly enhance production efficiency, reduce material waste, and adapt to various complex circuit board designs. They are widely used in fields such as electronic product manufacturing, semiconductor packaging, and new energy electronic equipment.
