The global Solvent Cleaning Equipment market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of %from 2025 to 2031.

Solvent cleaning equipment refers to machines or devices that are used to clean or remove contaminants from various surfaces using solvents. Solvents are liquid substances that have the ability to dissolve or disperse other substances, such as grease, oil, dirt, or chemicals.

Solvent cleaning equipment can vary in size and complexity, depending on the specific cleaning requirements and the type of contaminants to be removed. Some common types of solvent cleaning equipment include:

1. **Solvent tanks or baths:** These are large containers or tanks filled with solvent, where the contaminated parts or objects are immersed for cleaning. The parts are typically agitated or scrubbed to enhance the cleaning process.
2. **Ultrasonic cleaners:** These machines use high-frequency sound waves to create microscopic bubbles in the solvent, which implode upon contact with the contaminated surface, effectively removing the contaminants.
3. **Vapor degreasers:** These devices use a heated solvent that is boiled to produce vapor. The vapor condenses on the cooler parts, dissolving and removing the contaminants. The condensed solvent can then be collected and reused.

4. Spray washers: These machines use a spray nozzle or jet to apply solvent onto the surface to be cleaned. The solvent dislodges and removes the contaminants, which are then drained away.

5. Parts washers: These are machines specifically designed for cleaning small or intricate parts. They typically have rotating brushes, jets, or agitators to ensure thorough cleaning.

Solvent cleaning equipment is commonly used in industries such as automotive, aerospace, electronics, manufacturing, and maintenance, where precision cleaning is required. It is important to follow proper safety precautions when using solvent cleaning equipment, as solvents can be flammable, toxic, or harmful to the environment if not handled properly.

United States market for Solvent Cleaning Equipment is estimated to increase from US\$ million in 2024 to US\$ million by 2031, at a CAGR of % from 2025 through 2031.
