The global Solvent Recovery Equipment market size is predicted to grow from US\$ 1109 million in 2025 to US\$ 1358 million in 2031; it is expected to grow at a CAGR of 3.4% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Solvent recovery is a form of waste reduction. In-process solvent recovery is widely used as an alternative to solvent replacement to reduce waste generation. It is attractive, like end-of-pipe pollution control, since it requires little change in existing processes. There is widespread commercial availability of solvent recovery equipment which is another attraction. Availability of equipment suitable for small operations, especially batch operations, make in-process recovery of solvents economically preferable to raw materials substitution. The solvent recovery systems are custom designed to optimize the recovery of solvents by combining condensers, receivers, vacuum pumps, and controls in a packaged system.

United States is the largest Solvent Recovery Units (SRUs) market with about 26% market share. Europe is follower, accounting for about 24% market share.

The key players are Dorr Group, Sulzer, Progressive Recovery, Cooper Technology, OFRU Recycling, Controls Group, Koch Modular Process Systems, Wintek Corporation, SRS Engineering Corporation, CBG Biotech, Maratek Environmental, Spooner Industries, Wiggins, CB Mills, KOBEX etc. Top 3 companies occupied about 10% market share.
