Abstracts

According to this study, the global Solvent Recovery Systems market size will reach US\$ 1358 million by 2031.

Solvent recovery is a form of waste reduction. In-process solvent recovery is widely used as an alternative to solvent replacement to reduce waste generation. It is attractive, like end-of-pipe pollution control, since it requires little change in existing processes. There is widespread commercial availability of solvent recovery equipment which is another attraction. Availability of equipment suitable for small operations, especially batch operations, make in-process recovery of solvents economically preferable to raw materials substitution. The solvent recovery systems are custom designed to optimize the recovery of solvents by combining condensers, receivers, vacuum pumps, and controls in a packaged system.

United States is the largest Solvent Recovery Units (SRUs) market with about 26% market share. Europe is follower, accounting for about 24% market share.

The key players are Durr Group, Sulzer, Progressive Recovery, Cooper Technology, OFRU Recycling, Controls Group, Koch Modular Process Systems, Wintek Corporation, SRS Engineering Corporation, CBG Biotech, Maratek Environmental, Spooner Industries, Wiggins, CB Mills, KOBEX etc. Top 3 companies occupied about 10% market share.
