Solvent Safety Funnel is a funnel intended to be affixed to a receptacle for liquid chemical waste. It is designed to reduce environmental contamination, in compliance with OSHA and EPA mandated safety protocols.

The Eco Funnel is in great demand as it is an important laboratory safety tool for collecting hazardous liquid waste. Eco funnels are one of the most effective controls for preventing open chemical waste cans from burning gases and leaks. It aims to reduce environmental pollution, follow the safety practices of safety regulatory agencies, promote the sales of ecological funnels, and increase the market share of ecological funnels. Eco-Funnels prevent 99% of toxic fumes from spreading from research labs or workshops to other construction sites, stimulating demand for Eco-Funnels. The Eco-

Funnel is a one-of-a-kind design that eliminates steam-induced fires, as well as spillage of hazardous residues from open containers, and regulators such as the Occupational Safety and Health Administration (OSHA) and the Environmental Protection Agency (EPA) require all operating Businesses that use hazardous chemicals have requirements. The Eco Funnel is highly resistant to damage; it is resistant to all types of corrosion and fire, allowing it to function for a long time, thus helping to increase the revenue and sales of the Eco Funnel. Businesses in training and learning institutions, pharmaceuticals, chemicals, automotive, and many similar industrial manufacturing sectors all have a need for ecological funnels. Due to the wide range of needs and applications, the sales volume of the ecological funnel is very large.
