The global Sorbeth-30 Tetraoleate market size is predicted to grow from US$ 44.22 million in 2025 to US$ 69.20 million in 2032; it is expected to grow at a CAGR of 6.6% from 2026 to 2032.

In 2025, the global sales volume of Sorbeth-30 Tetraoleate was approximately 6,955 metric tons. The average manufacturer-level market price was about US$6.5 per kilogram, while the gross margin of major manufacturers ranged from approximately 28% to 42%.

Sorbeth-30 Tetraoleate is a nonionic surfactant produced through the esterification of Sorbeth-30, which serves as the hydrophilic base, with oleic acid. Its molecular structure consists of a polyhydric sorbitol backbone connected to polyoxyethylene chains containing an average of approximately 30 moles of ethylene oxide, together with four oleate groups. It therefore combines the hydrophilic properties of polyoxyethylene chains with the lipophilic properties of long-chain oleate groups

The product facilitates the emulsification and dispersion of vegetable oils, synthetic esters, and oil-based cosmetic ingredients in water, while improving the cleansing, spreading, and rinsing performance of oil-based formulations. It is particularly suitable for personal care formulations such as cleansing oils, cleansing balms, color cosmetics, and personal cleansing and hair care products. It can also be used in industrial emulsification systems, including metalworking fluids. Products from different manufacturers vary in color, acid value, saponification value, hydroxyl value, and odor control, and are generally available in industrial grade and personal care grade.
