Abstracts

The global Sorbic Acid Natural Preservative market size is predicted to grow from US$ 214 million in 2025 to US$ 349 million in 2032; it is expected to grow at a CAGR of 7.4% from 2026 to 2032.

In 2024, the global production of sorbic acid natural preservatives reached 63,000 tons, with an average price of 3,400 USD per ton, a production capacity of 70,000 tons, and a gross margin of 26%.

The upstream segment primarily involves raw materials such as unsaturated fatty acids, acetic acid, potassium salts, fermentation strains, and organic solvents. Fluctuations in raw material prices and fermentation costs directly affect production margins. The downstream sector covers food preservation, beverage stabilization, cosmetic antimicrobial formulations, and pharmaceutical preservation. With the rising demand for natural preservatives and the global “Clean Label” movement, the market for natural sorbic acid continues to expand steadily.

Sorbic acid is a broad-spectrum natural preservative, typically derived from rowan berries, hawthorn, or bio-synthesized from unsaturated fatty acids. It effectively inhibits the growth of molds, yeasts, and various bacteria, extending the shelf life of foods, beverages, cosmetics, and pharmaceuticals. With its non-toxic nature, mildness, heat resistance, and high stability, it is one of the most widely used natural preservation agents worldwide.

United States market for Sorbic Acid Natural Preservative is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
