With growing demand in downstream market, the Sound Level Meter is forecast to a readjusted size of US\$ 105.5 million by 2030 with a CAGR of 3.6% during review period.

The research report highlights the growth potential of the global Sound Level Meter market. Sound Level Meter are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Sound Level Meter. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Sound Level Meter market.

A sound level meter is used for acoustic (sound that travels through air) measurements. It is commonly a hand-held instrument with a microphone. The diaphragm of the microphone responds to changes in air pressure caused by sound waves. That is why the instrument is sometimes referred to as a Sound Pressure Level (SPL) Meter.

A microphone is distinguishable by the voltage value produced when a known, constant sound pressure is applied. This is known as the microphone sensitivity. The instrument needs to know the sensitivity of the particular microphone being used. Using this information, the instrument is able to accurately convert the electrical signal back to a sound pressure, and display the resulting sound pressure level (decibels dB SPL).

The most recent standards for sound level meters are international standard BS EN 61672:2013 or IEC 61672:2013 and these have superseded most previous standards.

This report mainly focuses on the sound level meters compliance with IEC 61672:2013, instead of simple sound level indicators usually less than \$600.

Asia Pacific is expected to be the fastest growing market over the forecast period owing to extensive usage in the industrial and environment field. Globally, the Sound Level Meters industry market is low concentrated as the manufacturing technology of Sound Level Meters is relatively immatures. And some enterprises, like Bruel & Kjaer, Cirrus Research, TSI-Quest, etc. are well-known for the wonderful performance of their Sound Level Meters. At the same time, China, occupied 29% sales market share in 2018, is remarkable in the global Sound Level Meters industry due to the lowest cost of raw material and labor. On the basis of type, the Sound Level Meters market has been segmented into Class 1 and Class 2. The Class 1 Type segment is estimated to register the highest CAGR, in terms of value, of the overall Sound Level Meters market.
