Abstracts

The global Sound Therapy App market size is predicted to grow from US$ 9378 million in 2025 to US$ 26630 million in 2032; it is expected to grow at a CAGR of 16.4% from 2026 to 2032.

A Sound Therapy App is a type of mobile application that utilizes sound waves to improve users' mental and physical well - being. It functions based on the principle of auditory brainwave entrainment, which aims to assist in altering the brainwave state by providing a stable frequency for the brainwaves to synchronize with.

With the acceleration of the pace of modern life, the pressure on people is increasing, and the awareness of mental health is gradually rising. Sound healing apps can help users relieve stress, anxiety, and improve sleep quality through sounds, meeting the growing demand for mental health. The widespread use of smartphones and tablets has provided a convenient platform for the promotion and use of sound healing apps. The large - scale penetration of mobile devices allows users to easily download and use sound healing apps at any time and place, promoting the growth of the market.

The continuous development of technology, such as artificial intelligence and big data, has been applied in sound healing apps. Developers can use artificial intelligence technology to conduct in - depth learning on sounds, realize personalized recommendation and intelligent adjustment, and improve the user experience, thus promoting the development of the market.

Governments around the world are gradually paying attention to the development of the digital health industry and have introduced relevant support policies. North America is one of the main markets for sound healing apps. The United States and Canada have a

high awareness of mental health, and the market is relatively mature. Europe also occupies an important position in the global market, and the market is expected to grow steadily in the future. The support of the European Union for the digital health field and the high recognition of sound healing by consumers have promoted the development of the market. The Asia - Pacific market growth potential is huge, especially in China and Japan. With the rise of the middle - class and the pursuit of a healthy life by consumers, the market demand is constantly increasing.
