The global crop pesticide market sales in 2022 will be US\$69.3 billion, with a CAGR of 5% in the past five years. The division of labor in the global pesticide industry chain has basically taken shape, with multinational giants firmly controlling the two high-value-added links of front-end innovative drug research and development and terminal preparation sales channels, thanks to a complete basic chemical industry system and highly competitive cost control levels. Since the outbreak of the COVID-19 epidemic, international food prices have risen sharply, demand for pesticides has increased simultaneously, and the price index has reached a record high. The industry has ushered in a highlight moment
