The global Speed Doors market size is predicted to grow from US\$ 1168 million in 2025 to US\$ 1678 million in 2031; it is expected to grow at a CAGR of 6.2% from 2025 to 2031.

High-Speed Doors are door systems, mainly used in industrial applications. They are technical enhancements of the generally known sectional doors, PVC fabric doors or roller shutters. The main difference is that the durable construction provides a higher operating speed and they are able to sustain a higher number of cycles (opening and closing cycles) and require lower maintenance and repair cost. The speed can reach 4.0 m and beyond per second. Depending on the intended field of application, horizontal or vertical operating door types are available. They reduce to the maximum air currents and losses of ambient temperatures, and they make the intense flow of people and vehicles easier. In North America, the Door and Access Systems Manufacturing Association (DASMA) defines high-performance doors as non-residential, powered doors, characterized by rolling, folding, sliding or swinging action, that are either high-cycle (minimum 100 cycles/day) or high-speed (minimum 20 inches(508 mm)/second), this report focuses on high-High-Speed Doors only. High strains, caused by the high operating speed (up to 4 m/s) and the frequency of openings, have to be taken into account during construction. In the same way, basic conditions like size and installation location add up to considerable requirements regarding safety and control technique.

Global Speed Doors key players include ASSA ABLOY, Efaflex, Rytec, Chase Doors, Hormann, etc. Global top five manufacturers hold a share about 35%. North America and Europe is the largest market, both with a share about 35%, followed by China and Japan, total with a share about 15 percent. In terms of product, Rolling Doors is the largest segment, with a share about 45%. And in terms of application, the largest

application is Food & Drink Industry, followed by Warehouse and Loading Bays, Pharmaceutical Environment, Large Exterior Openings, etc.
