The Spherical Sun Power Generator is a device that generates power using solar energy. The spherical shape of the solar collector, together with an included solar tracking system, covers a far smaller surface area than solar panels of equal efficiency, and allows a collection of energy, even if the light is very low. A spherical solar power generator uses a spherical crystal globe to absorb the sun rays as well as diffused rays and concentrate them on a lightweight, hyper-efficient, photovoltaic cell. Spherical Sun

Power Generator is used for power generation in the industrial, residential, and commercial sectors, also for electric car charging stations, energy-producing windows, autonomous power generators, etc.
