The report is about Spine Surgery Products market. Spinal fusion products are used in spinal fusion surgery. The products are involved in removing the damaged disc and replacing it with any fusion products. Non-fusion products are used during spine surgery, which are implanted to treat spine conditions. Increase in number of spine surgeries, rise in use of bone grafts and bone morphogenetic proteins in spinal fusion surgery, growing number of spinal surgeries using electrical stimulation devices such as inductive coupling devices, captive coupling devices and other implants drives the market growth rate by 2025.

In the United States, Medtronic, DePuy Synthes, Stryker, Nuvasive, and Globus Medical are the major vendors of spinal surgery products. The top three accounted for about 35% of the total market.

The south is the major market, accounting for about 35%of the U.S. market.
