Spiral stirring mixer is a kind of equipment used for mixing and stirring liquid, powder or granules, etc. It produces shearing, pushing and stirring effects through the rotation of the helical blade, so that the substances of different components are evenly mixed. This kind of mixer is widely used in chemical industry, food, pharmaceutical, metallurgy, environmental protection and other industrial fields. In the future, the blade material of the spiral stirring mixer may be more optimized to meet the mixing requirements of different substances and improve wear resistance and corrosion resistance.
