Split charging piles are actually relative to integrated charging piles. Integrated charging pile, that is, all the constituent units of the charging pile are integrated. The split charging pile can also be called a group charging system or a flexible charging pile, which consists of a split DC charger and a DC charging terminal. Since the split charging pile designs the charging output and the DC power unit separately, the number of charging guns configured for each DC power unit can be increased to 6 guns, 8 guns, or even 12 guns, etc., thereby achieving the effect of group charging.

The global Split Flexible Charging Pile market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
