Spodumene (Triphane) is a mineral that belongs to the pyroxene group of silicates. It has the chemical formula $\text{LiAlSi}_2\text{O}_6$ and it is one of the main sources of lithium, a metal used in batteries, ceramics, glass, and other applications. Spodumene (Triphane) occurs in various colors, such as white, gray, pink, yellow, green, and purple. The pink to purple variety is called kunzite, and the green variety is called hiddenite .

The industry trend of Spodumene (Triphane) is driven by the increasing demand for lithium ,which is essential for the production of batteries for electric vehicles ,consumer electronics ,and renewable energy storage .The global pandemic that emerged in 2020 and the green recovery initiatives that ensued also boosted the demand for lithium and spodumene (triphane) ,as governments and consumers sought to reduce their carbon footprint and dependence on fossil fuels .As a result ,many spodumene (triphane) manufacturers have expanded or accelerated their production capacity ,exploration activities ,and innovation efforts to meet the growing demand for lithium
