Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Compression clothing has become somewhat of an umbrella term for items that exist somewhere on a spectrum of super tight and super revealing, often hilariously coloured garments. True compression wear does have a purpose and, if the science is to be believed, true benefits. Designed to increase blood and lymphatic flow to the specified limb, compression wear is said to improve performance and shorten recovery time in both athletes and workout warriors when used post exercise.
